PAN-GERMANS ASK "THE REAL LEAGUE"

COPENHAGEN, April 30.—With Germany wailing in the chaos of defeat, the irrepressible Pan-German clique again comes to the front at Berlin with a "declaration" which is both pompous and grotesque. It was published as a supplement to the militarist newspaper Deutsche Tageszeitung, and if it were not for the horror into which Germany has been plunged it would furnish an element of weird amusement.

The Pan-Germans want the restoration of the monarchy, the overthrow of the present government, the ex-Kaiser and are looking forward to another war. The "declaration" is signed by about fifty militarists, professors, judges and professional men, most of them bearing titles. Among the signers are General von Gebasattel and General Leibert.

A copy of the text was received here today. In part it reads: "In consequence of the ignominious collapse of the German empire the Fatherland not only deprived of the successful aims of a heroic war carried on during four years, but also reduced to extreme military, political and economic impotence. The Pan-German League regards it as a duty of the German sense of honor that the national assembly offer the Kaiser and his consort a place of abode on German soil.

Deny Prolonging War.

"The Pan-German League repudiates the charge that it was accomplice in starting or prolonging the war. In spite of the frightful collapse we retain the belief that the German people may still be saved.

"The first prerequisite for this is that the government organize an army that inwardly and outwardly offers the Fatherland adequate protection and in which the officers assume the position to which they are entitled.

"The Pan-German League wishes to express the conviction that our Fatherland will require a navy also, in the future. It is important that we create it as soon as we are economically able.

"The Pan-German League can have no confidence in the present form of government as suitable for the German people. Events since November 9, 1918, have proved that a people that so decidedly lacks a determined political sense as do the Germans is unfit for the so-called free state form of government. For that reason we particularly cling to the Kaiser idea, which we are confident, even after this calamity, will preserve its old strength. Our country's disgraceful downfall in the last instance was due to lack of patriotism.

Would Blot Out Disgrace.

"They must be incited with the will to blot out the disgrace of this downfall that the nation may once more be worthy of its name. We demanded the war be conducted along lines that gave us an opportunity to bring every form of German arms into action for the purpose of felling our enemies' evil designs, because we knew exactly from history and the inclinations of our principal enemies that they did not strive after an understanding of the Germans, but the destruction of the German empire and the German race.

"If our enemies compel us to make territorial concessions, they must realize that the demands of the German people, which are based on the achievements of the Prussian kingdom through out history and a half, cannot be rendered permanently impotent through the present helpless condition of the empire.

Oppose Equality Doctrine.

"The maintenance of our people's numerical adequacy and our population areas require urgently that all of German Austria, including the German section of western Hungary and all of the ancient German territories in the Baltic states, be incorporated in an imperial league.

"In order to forestall the fact that our racial existence is threatened, we demand as early as possible an immigration law that will protect us against the incoming of alien races. We regard the doctrine of equality of all human beings as a dogma the realization of which would be a crime to our people."
